

AI OWNERSHIP ASSESSMENT MODEL (AIOAM) v1

Measuring Ownership Capability Across the Seven Layers of AI Ownership

GERALD ON GOVERNANCE STANDARD

v1

LAYER	OWNERSHIP LAYER	GOVERNANCE QUESTION	ASSESSMENT AREAS	ASSESSMENT QUESTIONS (Score 1–5)	EXPECTED OUTCOME
7	INCIDENT OWNERSHIP	Who owns AI failures?	- Incident Escalation - Kill Switch Authority - Root Cause Analysis - Recovery Ownership - Lessons Learned	- Is incident ownership assigned? - Is escalation authority documented? - Can AI operations be suspended? - Are incidents investigated? - Are lessons learned tracked?	 Clear incident accountability.
6	RISK OWNERSHIP	Who owns AI risk?	- Risk Identification - Risk Assessment - Risk Treatment - Escalation - Reporting	- Is risk ownership assigned? - Are risks assessed and documented? - Are risk treatments assigned? - Is risk escalation defined? - Are risk reports produced?	 Continuous risk accountability.
5	GOVERNANCE OWNERSHIP	Who owns governance execution?	- Policies - Controls - Compliance - Evidence - Reporting	- Is governance ownership assigned? - Are policies maintained and current? - Are controls implemented? - Is evidence collected and retained? - Are governance reports produced?	 Operationalized governance.
4	TECHNICAL OWNERSHIP	Who owns runtime operations?	- Infrastructure - Security - Monitoring - Availability - Incident Support	- Is technical ownership assigned? - Are security responsibilities defined? - Is system monitoring in place? - Are availability targets managed? - Is incident support defined?	 Reliable AI operations.
3	MODEL OWNERSHIP	Who owns model behavior?	- Development - Validation - Monitoring - Retraining - Documentation	- Is model ownership assigned? - Are models validated before use? - Is model performance monitored? - Are retraining criteria defined? - Is model documentation maintained?	 Controlled model lifecycle.
2	DATA OWNERSHIP	Who owns the data?	- Data Quality - Lineage - Privacy - Retention - Access Controls	- Is data ownership assigned? - Is data quality monitored? - Are privacy requirements met? - Are retention policies enforced? - Are access controls enforced?	 Trusted AI data foundation.
1	BUSINESS OWNERSHIP	Who owns the business outcome?	- Business Justification - Risk Acceptance - Funding - Strategic Alignment - Human Oversight	- Is business ownership assigned? - Is risk acceptance documented? - Is funding responsibility defined? - Is strategic alignment established? - Is human oversight defined?	 Executive accountability.

OWNERSHIP MATURITY SCALE (1–5)				
1 AD HOC	2 DEVELOPING	3 IMPLEMENTED	4 MANAGED	5 OPTIMIZED
Informal, inconsistent, and unstructured.	Processes are partially defined and documented.	Processes are implemented consistently across the organization.	Processes are monitored and effectiveness is actively managed.	Processes are optimized, adapted, and continuously improving.

OWNERSHIP SCORING MODEL (EXAMPLE)		
LAYER	SCORE (1–5)	RATING
1 Business Ownership	4.0	
2 Data Ownership	3.8	
3 Model Ownership	3.6	
4 Technical Ownership	4.1	
5 Governance Ownership	3.7	
6 Risk Ownership	4.2	
7 Incident Ownership	3.5	
OVERALL OWNERSHIP SCORE (AOS)	3.84	LEVEL 3 IMPLEMENTED

OWNERSHIP HEAT MAP (EXAMPLE)		
LAYER	RATING	
1 Business Ownership		Strong
2 Data Ownership		Moderate
3 Model Ownership		Moderate
4 Technical Ownership		Strong
5 Governance Ownership		Moderate
6 Risk Ownership		Strong
7 Incident Ownership		Weak
Strong (4.0 – 5.0) Moderate (2.5 – 3.9) Weak (1.0 – 2.4)		

ASSESSMENT OUTPUTS

 OWNERSHIP MATURITY RATING Overall ownership maturity and capability score.	 OWNERSHIP HEAT MAP Visual representation of strengths and weaknesses.	 OWNERSHIP GAP ANALYSIS Identification of ownership gaps and root causes.	 OWNERSHIP IMPROVEMENT ROADMAP Prioritized improvement actions with owners and timelines.	 EXECUTIVE OWNERSHIP SUMMARY Board and leadership summary and reporting package.
---	--	---	---	--

 PURPOSE Establish measurable and enforceable ownership across the AI lifecycle.	 PRINCIPLE Ownership must be assigned, measured, and continuously assured.	 OUTCOME Clear accountability for AI decisions, risks, controls, and incidents.
--	--	---

A COHERENT OPERATIONAL AI GOVERNANCE ECOSYSTEM
